Professional Summary

Full-stack developer specializing in the **MERN stack** with strong skills in UI/UX and graphic design. Experienced in designing user interfaces using Figma and Adobe Photoshop and implementing them using React.js. Capable of handling both design and development, ensuring visually appealing and functional web applications. Seeking to contribute to real-world projects requiring both technical and design expertise..

Technical Skills

Programming Languages: C, C++, JavaScript, Java, R

Backend: Node.js, Express.js, REST APIs

Frontend: React.js, CSS, HTML5,

Tools: Git, GitHub, Postman, Vite, vercel

Database: MongoDB

UI/UX & Graphic Design: Figma, Adobe Photoshop, Logo Design, UI Design, Wireframing, Layout Design

Projects

Portfolio Website | React.js, CSS [Visit here :\)](#)

- Developed a personal portfolio highlighting technical work and core competencies.
- Implemented modular, reusable CSS components for maintainable UI design.
- Deployed via Vercel for optimized load performance and public accessibility.

Budget tracker system (In development) | React.js, vite

- Building a finance management tool that allows users to log transactions with payer details, amount, category, and payment mode.
- Planning real-time visual summaries for total inflow, outflow, and net balance using lightweight charts.
- Designing an export-to-Excel feature to generate structured financial summaries for reporting.
- Focusing on clean UI, modular state management, and scalable frontend logic to support future backend integration.

Weather Check App | React, Weather API

- Created a lightweight weather utility fetching real-time climate data using a public API.
- Allows instant city-based lookup for temperature.
- Built a responsive interface with proper error handling for invalid inputs and API failures.

Education :

Bachelor of Computer Applications (BCA) — Pursuing

JECRC University | 2023–2026 | CGPA: **8.85/10**

Achievements / Activities:

Smart India Hackathon (SIH) 2025 — Participant (Research Track)

- Contributed to problem analysis, requirement research, and feasibility validation for the team's proposed solution.

1st Place — Frame of Creativity Poster Making Competition | JECRC University

- Designed an award-winning environmental awareness poster highlighting plastic pollution and its impact on nature
- Recognized for creativity, visual storytelling, and impactful design among multiple competing teams
- Created using Adobe Photoshop, applying principles of layout design, typography, and visual hierarchy
