## PROFESSIONAL SUMMARY

Full-stack developer specializing in the MERN stack with strong skills in UI/UX and graphic design. Experienced in designing user interfaces using Figma and Adobe Photoshop and implementing them using React.js. Capable of handling both design and development, ensuring visually appealing and functional web applications. Seeking to contribute to real-world projects requiring both technical and design expertise.

## TECHNICAL SKILLS

|           |                                                                       |
|-----------|-----------------------------------------------------------------------|
| Languages | C, C++, Java, JavaScript, R                                           |
| Frontend  | React.js, HTML5, CSS3, Vite                                           |
| Backend   | Node.js, Express.js, REST APIs                                        |
| Database  | MongoDB                                                               |
| Tools     | GitHub, Postman, Vercel                                               |
| Design    | Figma, Adobe Photoshop · Wireframing, UI Design, Logo & Layout Design |

## INTERNSHIP EXPERIENCE

**Backend Developer Intern** · CollegeDekho

May 2025 – July 2025

*Project: Full-stack E-Commerce Platform — sole owner of backend architecture*

- Architected and implemented the complete backend infrastructure using Node.js and Express.js from the ground up.
- Designed MongoDB schemas for products, users, orders, and cart, ensuring data integrity and query efficiency.
- Built RESTful APIs covering user authentication (JWT), product catalogue, cart management, and order processing.
- Integrated middleware for request validation, error handling, and role-based access control (customer vs. admin).
- Coordinated with the frontend team to define API contracts enabling seamless React-based UI integration.

## PROJECTS

**Portfolio Website** | React.js, CSS [Visit here :](#)

- Developed a personal portfolio highlighting technical work and core competencies.
- Implemented modular, reusable CSS components for maintainable UI design.
- Deployed via Vercel for optimized load performance and public accessibility.

**Ecommerce Platform** | React.js, vite, mongoDB

- Architected complete backend from scratch including server setup, routing, and middleware pipeline.
- Designed MongoDB schemas for products, users, cart, and orders with role-based access control.
- Built RESTful APIs for user auth (JWT), product catalogue, cart management, and order processing.
- Defined API contracts with the React frontend team for seamless UI-backend integration.

**Weather Check App** | React, Weather API

- Created a lightweight weather utility fetching real-time climate data using a public API.
- Allows instant city-based lookup for temperature.
- Built a responsive interface with proper error handling for invalid inputs and API failures.

## EDUCATION

**Bachelor of Computer Applications (BCA) — Pursuing**

JECRC University | 2023–2026 | CGPA: 8.85/10

## ACHIEVEMENTS & ACTIVITIES

**Smart India Hackathon (SIH) 2025 — Participant (Research Track)**

- Contributed to problem analysis, requirement research, and feasibility validation for the team's proposed solution.

**1st Place — Frame of Creativity Poster Making Competition | JECRC University**

- Designed an award-winning environmental awareness poster highlighting plastic pollution and its impact on nature
- Recognized for creativity, visual storytelling, and impactful design among multiple competing teams
- Created using Adobe Photoshop, applying principles of layout design, typography, and visual hierarchy
